

METRAL® POWER, HIGH POWER AND COAX CONNECTORS

OVERVIEW

Metral® power, high power and coax connectors are standalone modules, end-to-end stackable with Metral® signal modules. The connectors are designed in accordance with IEC 61076-4-104 and Telcordia GR-1217-CORE.

Metral® power, high power and coax connectors support power solution with current rating of 3 to 40A for each pin. They are available in 4 and 5 row versions.

The power connector range featuring blade contacts is offered in vertical headers and right angle receptacles, right angle headers and vertical receptacles. The coax range includes single and multi pin versions.

Metral® backplane connectors meet Futurebus+ standards to support applications in data, industrial and instrumentation, medical and telecom markets.
